

## **ICID and ICOLD Presidents write to World Bank President**

After recent criticisms of dams for water storage and hydropower, emanating from certain NGOs, sometimes from misinformed decision makers, or expressed in pseudo-scientific papers, ICOLD and ICID Presidents decided to write to World Bank President to express their support for "for the development and implementation of well-run projects, to manage world water for the benefit of people, the prosperity of nations and the world."

The letter is public and can be downloaded [here](#)
