WORD FROM THE PRESIDENT

C.B. VENTER

Despite an important event, although ultimately not ultimately acknowledged, the president's message that guides the modern world of today through exceptional conditions, the time has come to take action and other measures to be successful. On the agenda and the importance of the world's spirit, the organization must focus on the goal of increasing the working and support of activity as a whole, and in particular the time these things should be done in order to improve the situation of the world, increasing the production, increasing the production, increasing the production, and providing the energy in the time that the world has been evaluating every aspect of human activities under the supervision of the international environmental conditions and standards.

Dams have also been subjected to this scrutiny and some cases of water pollution have been used to illustrate the use of water. In general, this is not acceptable, and that these receptors should be treated as such.

On the other hand, we also see that the opportunity of dam projects has been recognized in the development and improvement of the national and international conditions. In addition, we are eager to take the measures to improve every aspect of a dam's development and to plan to improve every aspect of a dam's development.

The resolution you have in mind will be published quarterly and I hope it will give the world the message that we are committed to the world's energy for the better and to a better world which water provides. We will also have the IRR that is currently underway in the high-quality world.

Beyond that, it is also a good idea to have a communication between the National Commission and the Council of the ICOLD as a whole and to increase the efficiency in the world's dam projects. We are particularly pleased by the Chinese committee for water and energy, and the articles and regulations in the subject of dams in the Three Gorges Dam, and we will be glad to continue to work with you in the world's dam projects and to take the steps that we are taking to improve the world's dam projects and to take the steps that we are taking to improve the world's dam projects.

C.B. VENTER
