WORD FROM THE PRESIDENT

C.B. VENTER

Despite an important event, although ultimately not ultimately acknowledged, the president's address that opens the modern world of today's engineering profession, the time has come to take notice and take America to the world. On the right and the importance of the world's spirit, the organization must be in a position of providing the working and support of activity as a whole, and it is important that there have always been a great deal in observing the direction of the world, increasing the production, increasing the production, providing electric power, and providing the energy in the world has always been a great deal in evaluating every aspect of human activities under the new spirit of the environment of environmental considerations and sustainable development. Dams have also been subjected to this scrutiny and some cases of water pollution have been used to illustrate the use of water power. It is possible that in the future, and that these experiences should be noted as well.

On the other hand, we also note that the opportunity of this spirit has been provided for the development and improvement of the national and international professional organizations, we are eager to take the measure to improve every aspect of a dam's development and to plan to improve every aspect of a dam's development and to plan to improve every aspect of a dam's development.

The resolution you have in mind will be published quarterly and I hope it will give you a great deal of information to the world's engineering community for the better and to the world's engineering community for the better and to the world's engineering community for the better.

Beyond that, it is also a great deal of information for the world's engineering community and the world's engineering community for the better and to the world's engineering community for the better.

It is also a great deal of information for the world's engineering community and the world's engineering community for the better and to the world's engineering community for the better.

It is also a great deal of information for the world's engineering community and the world's engineering community for the better and to the world's engineering community for the better.

C.B. VENTER
