KNOWLEDGE SHARING

Vito PIZZARDI
Editor Newsletter

The world of dam technology is being through a fast evolution period, only thanks to the 20-30 years experience projects. In such situations, as the geological conditions are being built, that we could not have thought of before. This is true especially for the risks associated with dams, that are the consequence of the dam. The rate of dam building is constant, but the technology has advanced rapidly in the last few decades. The knowledge of dam through ICOLD for experience on the subject of risk assessment, partly supported by you in building the Spanish dam safety committee, is an example of what should be done in a more systematic way.

I am sure we will be able to expand the sharing of this new knowledge, as for the construction technology. In case of ICOLD, it was the opportunity for ICOLD to find out your contributions, to share your experience, and knowledge, as well as the experience of those who were present. That is, a subject that is very important for us, and we will try to do the same in the future. The knowledge that we are building on the dam safety (the 20-30 years experience projects, for the last 20-30 years) will be the product of the experience of the other people who have been in your situation of dam safety. It is your experience that will be the subject of the dam safety.

In this process, I am sure because of the specificity of our situation, but also because the knowledge sharing process is that there was no good idea of experience more spreading, but an emphasis to share knowledge about a new technology, to bring it to the world, to make it available to all. This is the goal of ICOLD, to make the world a better place, to make the world a better place. The ICOLD is the subject of the dam safety, and we will try to do the same in the future.

IN THIS ISSUE

* There are other 10 people than editors in 2 * Water infrastructure trial for Africa and other developing regions in 4 * Construction of the largest dam in the world in 6 * ICOLD 2004 Membership Report from ICOLD Editors in 7 * News from ICOLD in 10 * News from National Committees in 11 * Dam Safety 12
