

Hydropower Europe - Regional Workshops, 28-29 August, Lulea, Sweden

[HYDROPOWER EUROPE](#) is an EU-funded project that aims to create a Forum gathering all the hydropower stakeholders throughout Europe. The project is currently undertaking a consultation process directed at collecting inputs from such stakeholders, with the ultimate goal of achieving a *Research and Innovation Agenda* (RIA) and a *Strategic Industry Roadmap* (SIR) for the sector. A vital part of the consultation process will take place with the three one-and-a-half day [regional workshops](#) organised to discuss regional issues and hydropower challenges in 3 different climatic regions, with the intervention of expert industry and high-level official speakers. During the events, groups of participants will also lay out analyses for hydropower-related statements and exchange their views on the 2 main documents (RIA, SIR).

Register now on the [Consultation Platform](#) and sign up for the [regional workshops](#)! Participation is free of charge:

- ▶ **Nordic workshop:** 28-29th August in Lulea, Sweden.
- ▶ **Alpine workshop:** 11-12th September in Lausanne, Switzerland.
- ▶ **Mediterranean workshop:** 30th September – 1st October in Chania, Greece.
