

European hydropower Trade fair and Conference 29-30 Novembre 2018

RENEXPO® INTERHYDRO

Europe's meeting point for hydropower

November 29th and 30th 2018, Salzburg, Austria

On November 29th and 30th, [RENEXPO® INTERHYDRO](#), Europe's meeting point for hydropower, will focus on the general conditions and current trends in hydropower, as well as economic efficiency and ecological aspects. The trade fair and conference in Salzburg will again offer a unique platform for presentations and knowledge exchange as well the opportunity to create new contacts

At the [conference](#), topics include technical innovations and current challenges in the industry as well as energy storage and water-ecological aspects, economic viability, direct marketing and e-mobility. There is also the opportunity to take part in an excursion to the hydroelectric power station Lehen.

The "3rd European Hydropower Association Meeting" as well as the "2nd Eastern European Hydropower Forum", Western Balkan as this year's partner region and Africa as this year's partner continent will advance the international networking at the event.

The RENEXPO® INTERHYDRO addresses those active in the hydropower, from trade and industry, authorities and municipalities, politics and science, as well as universities and academic institutions from all over the world.

You can [download a free ticket here](#) and visit the trade fair for free.

Over 125 exhibitors, 500 congress attendees, and 2,500 visitors are expected.
